## **DETAILED ACTION**

The amendment filed November 16, 2006 and the remarks presented therewith have been carefully considered and are deemed to be persuasive in overcoming the rejections set forth in the last Office action. However, a new <u>non-final</u> Office action in response to applicant's amendment follows below.

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 3. Claims 1-4, 6, and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lovegrove (2,572,640) in view of Pearson (5,387,068).

Application/Control Number: 10/711,942

Art Unit: 3652

Lovegrove shows an air-powered vacuum tool comprising a plurality of vacuum ports (14) formed in a body (12) and a plurality of pickup orifices (18) operatively connected to certain ports. Lovegrove uses a manual dial valve (38) to selectively provide vacuum to the desired ports (14) rather than using a dedicated generator for each port as is called for in the above claims of the instant application.

However, Pearson shows it old and well known to separately provide an individual vacuum generator (44) for each area of vacuum desired. This provision of multiple generators allows a vacuum force to be selectively created at desired locations along the tool to efficiently handle workpieces of varying shapes and sizes.

Accordingly, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide a separate vacuum generator for each vacuum port (14) of Lovegrove's tool as taught by Pearson so that only those ports needed for engaging certain sized articles could be actuated thereby saving energy.

4. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lovegrove in view of Pearson as applied to claims 1-4, 6, and 7 above, and further in view of Conboy (3,933,388).

Conboy shows a suction hoisting tool comprising a venturi-type vacuum generator that can also function to provide positive air pressure to blow off a work piece when positioned at a desired location.

It would have been obvious to a person having ordinary skill in the art to provide a venturi-type blow off valve on the modified Lovegrove assembly, as was presented Application/Control Number: 10/711,942

Art Unit: 3652

supra, as taught by Conboy so that a gripped workpiece could be accurately removed at a desired location.

## Allowable Subject Matter

5. Claims 8-20 are allowed.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dean J. Kramer whose telephone number is (571) 272-6926. The examiner can normally be reached on Mon., Tues., Thurs., Fri..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eileen Lillis can be reached on (571) 272-6928. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
